CAREER OBJECTIVES

I have more than 4 years of software development experience in OutSource and Product projects. OutSource projects develop image processing applications, vehicle recognition, IoT applications, and e-commerce for the Japanese market. Currently, I am working at TopCV Vietnam Joint Stock Company with products for candidates and employers. My upcoming goal is to work at professional technology companies. I want to learn more from experienced colleagues, contribute to the company as well as develop myself to become a Senior Developer or Technical Leader.
